

SUPREME-AIR™

SPECIFICATIONS

SUPREME AIR™ MATTRESS

Dimensions: 35" x 80" x 8"
Weight: 18 lbs.
Air Cells: 16, 8" Air bladders
 13 Alternating pressure cells
 10 Low air loss cells with air holes
 3 Static cells in head section
Air Cells Option: 14, 8" bladders & 4, 4" foot section air bladders

Adjustable anchor straps secure mattress to bed frame.
 Fire evacuation safety handles standard on all models.

Mattress Cover: Vyvex III™-low shear, removable, zippered
 moisture resistant / vapor permeable cover

PUMP

Dimensions: 12.5" x 9" x 4.5"
Weight: 7 lbs.
Electrical: 120 60Hz
Cycle Time: 10 Minutes
Air Flow: 6.5 - 9.5 liters
Listings: UL CE S
Ground Resistance: 0.1 ohms maximum
Current Usage: less than 100 micro amps
Power Cord: 16 ft.
Construction: ABS fire retardant UL 94V-0

standard pump

optional digital pump

PDAC Approved
 Medicare E0277

SUPREME AIR™ MATTRESS SYSTEM- MODEL 9600

The Supreme Air™ Alternating Pressure Low Air Loss Mattress System combines the most advanced technology and clinically effective features in a portable system. The mattress utilizes 16 independent 8" deep air cells to provide pressure redistribution for the prevention and treatment of Stages I-IV pressure ulcers. User friendly controls and ease of setup make Supreme Air™ ideal for institutional use and the home bound patient. Cover is loose fitting and will conform to the patient. The mattress was designed to fit all standard hospital beds. Supreme Air™ supports patients weighing up to 350 lbs. Supreme Air™ meets California Technical Bulletin #117 for fire retardancy. An optional fire barrier is available to meet the most stringent fire safety requirements when requested.

PUMP CONTROL UNIT FEATURES:

Control Unit includes two modes of operation:

Modes

- Alternating pressure provides the therapeutic benefit of reactive hyperemia and redistributes pressure well below 32mmHg.
- Static mode provides gentle low air loss with constant pressure redistribution and support. This allows nursing to perform patient care.
- Adjustable cycle time 10, 15, 20 minutes.

Control dial adjusts mattress from soft to firm for patient comfort.

Lock-out - Locks pump to prevent unwanted changes

Low Pressure Alert and Auto Alarm System offers dual protection to notify caregiver in case of power outages or accidental disconnection of hoses.

optional digital pump

Shown with optional 9600-SRS Side Rail Safety System

Optional 4 bladder heel section provides advanced dynamic therapy specific to the prevention and treatment of heel ulcers.

Ventilated low air loss bladders include 40 air holes in sacral and torso areas to help minimize skin maceration by reducing excess moisture under patient. Air cells are constructed of laminated medical grade nylon and (TPU) thermal polyurethane fabrics. This combination ensures strength, durability and patient comfort.

CPR Valve quickly deflates mattress system for medical emergencies. A simple twist releases the air immediately. This multi-purpose CPR Valve can be used to inflate or deflate the mattress with our optional blower pump.

Vyvox III™ multi-directional stretch fabric transfers moisture away from the patient's skin. The cover is low shear, washable, anti-microbial, fluid resistant and fire retardant. Cover is loose fitting and will conform to the patient.

Transport locking device ensures mattress remains inflated during a power outage or for patient transport. Reinforced hoses prevent air restriction due to kinking.

Deluxe adjustable hanger brackets secure control unit to fit all makes of hospital beds.

Easy access filter reduces damaging dust particles for maintenance free use.
