SEATING & POSITIONING

PRO POSITIONER™ - MODEL 6240 & GEL-PRO™ POSITION PLUS™ WITH GEL - -MODEL 6250

Skin Protection and Position Cushion

The Pro Position™ and The Gel Pro™ Position Plus™ with pressure redistribution gel provides the most advanced pressure redistribution, therapeutic support and positioning available. Through proper immersion of the bony prominences the Gel Pro™ Position Plus™ cushion allows therapists to offer correct posture, proper spinal alignment, trunk stability and all the pressure redistribution characteristics required for a seating application. All cover materials are anti-microbial and meet California Technical Bulletin #117 for fire retardancy. An optional solid seat insert is available. Supports 250 lbs.

GEL-PRO™ ELITE - MODEL 6204

Skin Protection

Our segmented gel bladder contains an aqueous, highly viscous gel which provides for pressure redistribution, proper immersion and envelopment around the bony prominences. The bladder is surrounded by a high density foam shell that is covered using Vyvex-I™, a fluid-proof, low shear nylon top with a medical grade vinyl bottom. Supports 250 lbs.

GEL-PRO™ ELITE-DLX - MODEL 6204-CG

Convuluted Gel Cushion

This versatile reversible gel cushion utilizes the same gel formulation and bladder design as used in the Gel-Pro™ Elite cushion. The low shear nylon cover is anti-microbial and fluid-proof to protect the inner core. Supports 250 lbs.

SELF ADJUSTING GRZ™ - MODEL GRZ-WC

3 independent air cell chambers

adjustable valves

Safety Strap and Buckle
secures GRZ™ to Wheelchair.

The GRZ™ is dynamic adjustable air bladder system consisting of 3 individual air cell chambers which redistribute pressure and adjust to body weight and position. Ideal for patients with moderate to high risk of skin breakdown who require significant postural support. The GRZ™ allows the therapist to offer correct posture, proper alignment and trunk stability as well as adjustments for pelvic obliquities. Does not require pump for adjustment. Adjustable strap secures cushion to wheelchair. Supports up to 300lbs.

SEATING & POSITIONING

AMARA™ COMPONENT BASED SYSTEM ALLOWS FOR CUSTOMIZATION

The Amara™ provides rehabilitation specialists a component based system which provides, within one cushion series, a choice of perfectly matched bases and inserts to address a wide range of patient's needs. Amara™ is a component based system which offers a variety of positioning bases in conjunction with a selection of pressure redistribution inserts. Amara's innovative deep well design is incorporated into the cushion's high density Medflex™ or Viscotec™, visco elastic foam base, under the ischials and coccyx: Viscotec™ memory foam, Gel-Flex™ with Viscotec™, Soft-Flo™ viscous gel or Gel-Flex™ solid gel inserts. Each combination of insert and base redistributes pressure and reduces shearing forces.

Safety Strap and Buckle secures Amara™ to Wheelchair.

GERI-GEL OVERLAY - MODEL 6200NS

Patient comfort and pressure redistribution is achieved for individuals who sit for extended periods of time during the day. Fits most standard recliners. Special sizes available for use in Dialysis and Chemotherapy recliners. Ideal for home style lift chairs. The three section overlay is constructed with an aqueous, highly viscous gel that is encapsulated in a high density foam shell. The overlay is covered with Vyvex-III™ Stretch Cover and a non-skid Bottom. An adjustable safety strap secures the overlay for added safety. Cover material is anti-microbial and fire-retardant. Supports patients weights of 250 pounds. Bariatric and custom sizes available.

CHAIR-AIR™ MODEL 9700GR GERIATRIC RECLINER MATTRESS & PUMP SYSTEM

This unique alternating pressure mattress system allows for patients who are at high risk for pressure sores to be placed in a variety of mobile devices. Patients are no longer confined to bed for the whole day due to risks of sitting without proper pressure redistribution. Chair-Air™ systems can be integrated into a geriatric chair, recliner or standard high-back wheelchair. Twenty bladders gently alternate, providing low interface pressures in addition to comfortably supporting the patient. The Chair-Air™ 9700GR system includes the 9701 alternating pump. Chair-Air™ meets California Technical Bulletin #117 for fire retardancy.

WHEELCHAIR POSITIONING BELTS

Safety is a must for all patients sitting in a wheelchair. We offer three styles of belts that are easy to attach to any standard wheelchair frame.

Auto Push Button: This buckle style offers a spring loaded "pop-out" connector. The center release mechanism separates with minimum effort.

Side Release: This injection molded Delrin "side release" buckle provides excellent durability with light weight structure. Just squeeze the sides for quick release.

Hook and Closure: The remarkable sheer strength of hook and loop closure plus its "Clinch" features makes this seat belt one of our best. It is easy to use, lightweight and boasts a simple on and off quality.

SEATING & POSITIONING

AMARA™ THERAPEUTIC WHEELCHAIR BACK SYSTEM

Amara™ Therapeutic Wheelchair Back System improves the comfort and support of your existing wheelchair back by eliminating the hammock effect. Amara provides proper patient positioning to maintain spinal and shoulder alignment and superior pressure redistribution to prevent skin breakdown. Amara™ comes in five configurations: Dual-Zone design (BK-1), Fixed Back (BK-2), Adjustable Lumbar Support (BK-3), Adjustable Back (BK-3-ADJ), One Piece seat and back (AMR-COMBO). Amara™ combines the unmatched support and therapeutic pressure redistribution qualities of perfectly matched foams. All backs are 16" in height unless custom ordered. All Amara™ backs come with safety strap and buckle.
